Meeting Summary for Group Meeting

Feb 17, 2026 07:59 PM Pacific Time (US and Canada)   ID: 851 0488 2064

Teammates attended: Sofia Silva, Sonali Lonkar, Meghana Koti

Main purpose

- Review and organize research papers for literature review
- Discuss candidacy form submission
- Plan writing reviews for selected papers
- Prepare for state-of-the-art section

Project status

Issue/Ticket	Status
Candidacy Form	- Form due tomorrow - All team members need to select "Plan B" - Need to include proper course names from catalog - Some confusion about whether to include specialization/concentration (DS for Data Science)
Literature Review	- Team has collected approximately 20 papers - Papers need to be categorized and prioritized - Green-highlighted papers selected for review - Categories established: over-provisioning, motivation, recurrence, pre-execution prediction, methodology, metrics - Reviews to be completed by Friday
State of the Art	- Will be developed after literature reviews are complete - Should address current gaps in technology

	● Will incorporate findings from literature review

Other topics

- Discussion about Azure papers showing $17 billion wasted annually due to over-provisioning
- Evaluation metrics paper found that professor specifically requested

Action items

- **Meghana**
